### Description - Specifications

**FERTICELL NPK 5-5-5 soluble liquid** is an organic liquid fertilizer, indicated for the prevention and correction of nitrogen, phosphorus, and potassium deficiencies. It promotes the growth and vigor of all plants and is chloride-free.

**FERTICELL NPK 5-5-5 soluble liquid** can be applied both foliarly and by irrigation to all types of crops during any stage of the vegetative cycle.

**FERTICEL NPK 5-5-5 soluble liquid** is an organic and ecological protein powder. It is rapidly absorbed and highly efficient. Absorption can reach 90% within the first 3 hours after foliar application. It is nitrogen-neutral and reduces the risk of nitrogen contamination.

The application of **FERTICELL NPK 5-5-5 soluble liquid** is designed to avoid the excessive use of nitrogen fertilizers. It should be applied during the most critical stages of plant development: post-transplanting, growth, pre-flowering, fruit set and development, and when adverse conditions exist for crop development: heat stress, frost, hail, water or salinity stress, pest and disease infestations, phytotoxicity, etc.

**FERTICELL NPK 5-5-5 soluble liquid** used during the growth phase, activates the activator of the metabolic systems of crops and gives vigor to plants, improving their response to abiotic stress as well as the healing of the cut/wound in the leaves of the crop thanks to its high content of amino acids.
