

Description- specifications

FERTICELL SUPER GROW is a liquid fertilizer of unicellular freshwater algae, used for both foliar applications and fertigation. It is used to increase production (kg), with optimized quality (size and consistency).

When mixed with agrochemicals, it prevents the plant from phenological stress due to the aggressiveness of applied chemical molecules.

FERTICELL SUPER GROW contains unicellular algae, being completely neutral and biologically active, generally used as a vehicle in foliar mixtures with insecticides, fungicides and fertilizers, enhancing their effects.

Unicellular-algae are themselves a source of nutrients, helping plants make better use of nutrients existing in their tissues and on the soil, improving the intercellular exchange of nutrients. The final result in terms of plant growth is a higher yield, better root structure, less vulnerability to diseases, precocity, more homogeneous fruits and a longer life in postharvest quality.

Thanks to **FERTICELL SUPER GROW**, you can increase crops productivity, as well as favor protein synthesis like auxins.

Uses

Foliar
Fertigation

Available containers

0,500L. serigraphed packaging
10 L.
20L.
1,000 L.

GUARANTEED ANALYSIS:

Composition	Percentage (w/w)	Percentage (w/v)
Total Oxide potassium (K ₂ O)	1.00%	1.01%
Algae solution (100% from unicellular fresh water algae extract)	25.00%	25.25%

PHYSICAL PROPERTIES

State:	Liquid
Color:	Dark green
Density:	1.01 ± 0.01
pH:	6.0 ± 1.0

GENERAL USAGE AND DOSAGE RECOMMENDATIONS

Crop	Foliar dose	Fertigation dose
Fruit trees: Citrus fruits, Apples, Pears, Blueberries, Almonds, Cherries, Peaches, Avocado, Mango, Banana, etc...	-Maintenance: 2-4 l/ha or 200-400 cc/100 l/ application -Strong deficiency: Up to 4 applications Minimum of 2 applications	
Horticultural crops: Tomato, Potato, Cucumber, Melon Courgette, Cauliflower, Onion, Carrot, Pepper, etc...	-Maintenance: 2-5 l/ha or 200-500 cc/100 l/ application -Strong deficiency: Up to 4 applications Minimum of 2 applications	
Extensive crops: Cereals, Alfalfa, Cotton, Beetroot, Corn, Sunflower, etc.	-Maintenance: 2-3 l/ha or 200-300 cc/100 l/ application -Strong deficiency: Up to 4 applications Minimum of 2 applications	

• The specified dosages are general recommendations. The amounts depend on the crop, phenological state, level of deficiency and soil type.

• The physical and appearance characteristics of the product may be altered due to the ecological nature of the product.

• Use under technical advice.

Important notes:

1. Shake the container vigorously before use. **If stored, shake immediately before use.**
2. Keep product at **room temperature**, in a cool and dry place.
3. In field transplantation, use a 10% of **FERTICELL SUPER GROW** solution and apply directly to the plants to avoid stress (it is recommended to immerse the trays with seedlings before transplanting).
